

Organic farmers follow specific practices in order to be certified by the United States Department of Agriculture National Organic Program.

Organic Farmers DO:

- \* Focus on building healthy soils
- \* Integrate all farming practices to produce healthy crops and livestock
- \* Use natural sources of fertility including manures, composts, cover crops, and natural fertilizers

Organic Farmers DO NOT:

- \* Use synthetic pesticides or fertilizers on crops
- \* Use antibiotics with animals
- \* Use genetically engineered plants and animals (GMOs)
