What is E15?

E15 is gasoline more than 10% ethanol by volume, but not more than 15% ethanol by volume.

What vehicles may use E15?

Model year 2001 and newer cars, light-duty trucks, and medium-duty passenger vehicles (SUVs); and flexible-fuel vehicles (FFVs) are allowed by the EPA to use E15.

What vehicles and engines may NOT use E15?

All motorcycles; all vehicles with heavy-duty engines, such as school buses, transit buses, and delivery trucks; all off-road vehicles, such as boats and snowmobiles; all engines in off-road equipment, such as lawn mowers and chain saws; all model year 2000 and older cars, light-duty trucks, and medium-duty passenger vehicles (SUVs) are prohibited from using E15 by federal law.

What fuel quality specifications would E15 be subject to in Wisconsin?

E15 must meet the specifications outlined in ASTM D4814.

Is additional documentation required for E15?

The EPA requires Product Transfer Documents (PTDs) to accompany all transfers of fuels for E15 use.

Are there additional requirements for manufacturers of E15?

The EPA requires parties involved in the manufacture of E15 to participate in a survey of compliance at fuel retail dispensing facilities to ensure proper labeling of dispensers. Parties must submit a plan addressing conditions to EPA for approval.

More information on these requirements can be found at [epa.gov](https://www.epa.gov).
